Abstract

The Alumni Tracer System for communication with alumni embodies one of many ways how university can keep tracking its graduate. The system created collects actual information about working experience of graduates, which will improve faculty credits and teaching process. The presented focuses on usability and comfortable user interface. The project manages the fresh as well as old graduate students with their respective information in actively participating in making registration, searching, managing the alumni information for sharing their expertise, network, jobs opportunities and resources. This participation has evolved into multiple dimensions; and is now eager to formally enter into the domain of mentorship to students through a regular program. Alumni Tracer System is a step towards this, creating multidimensional interactions between current and past students of University of Embu. This system will also enable the university to communicate with their alumni as a follow up after studies, the data collection was achieved by use of questionnaires which the alumni was engage with.
